ABOUT ME

I'm a self-taught frontend developer. I have been coding for over two years while working in a different field. Programming has become my passion, and I've been dedicating my free time to learning, building projects, and improving my skills. I'm now looking for my first opportunity in the industry, where I could get a job where I can work with experienced developers, gain mentorship, and contribute with my enthusiasm for web development. I believe that learning never stops, and I'm excited to take the next step in my career as a frontend developer.

PROJECTS

EAT AND SPLICE

This project made with ReactJS helps you to calculate expenses between you and your friend when paying the bill in a restaurant.

TODO APP

Todo App made with NextJS and Supabase backend. Users can login where they can see their tasks.

INESTYLE

This is a page I made for my good friend Ines when she opened her hair and beauty saloon. It is made with ReactJS and TailwindCSS.
